Listed in this issue are the clinical products and materials that I use in my dental practice. Many of the materials have changed since last year’s Review issue. Check back at the web site for changes throughout the year as I find new products and new product suppliers.

Acrylic

Jet Acrylic/Powder and Liquid (for all provisional restorations)
Lang Dental Mfg. Co./Local Supplier

Jet Acrylic is still the standard in my office for provisionals, primarily because, unlike composite materials, it can be trimmed to a very fine margin without flaking away. Also, with air abrasion, extra retention can be achieved, unlike with Bisacryl materials. Jet Acrylic is exothermic; however, the heat problem is mitigated because the acrylic is never allowed to heat up in the mouth. Provisionals in my office are made with an indirect technique. Provisionals made of Jet can be flexed for easy removal when Durelon is used as the provisional cement.

Super-T (provisional material used for joining sectioned temporaries or repairing broken temporaries in the mouth and painting in margins on models and in the mouth).

American Consolidated Mfg. Company
Super-T is used primarily as a repair material, although it can also be used to add contacts. It sets hard in one minute, so care must be taken not to lock a provisional in when painting intraorally. Keep out of light.

Acrylic Finishing

For straight handpieces:
H1-023 ROUND BUR (for relieving inside of temporaries)
(261E-11) 023 CARBIDE BUR (for refining embrasure areas)
(858-11) 012 CARBIDE BUR (for defining occlusal anatomy)
(858-11) 014 DIAMOND (for refining interproximals)
(894-11) 060 LAB DIAMOND (for creating negative contour and refining temporaries)
(365-220) SERRATED DIAMOND DISC (for separating temporaries)
(H72-11) LAB CARBIDE (for gross trimming of temporaries)
(H79SG-11) 070 CARBIDE BUR (for cutting stone)
6934-11-300 DIAMOND STONE CUTTING DISC (used with indirect provisional technique to trim away stone from acrylic to prevent breaking temporaries that are thin - for all ceramics)
911H-11-180 HyperFlex Double sided Diamond (separating and contouring)
943-11-100 Miniflex Double Sided Diamond (fine trimming, small proximities)
934-11-100 VisionFlex Open-Meshed (ultra fine separating and contouring)
(H77E-023, H77E-023F & H77E-029, H77E-029F) CARBIDE BUR (for die trimming)
(H77) Lab Carbide (for gross trimming)

Brasseler USA
Acrylic Polisher

Polycril Advance alternative for polishing acrylic & resin material. (polishing temporaries & dentures)
Local supplier

---

CoJet Sand [3M ESPE]
- Blast-Coating Agent 30pm
  3M ESPE/Henry Schein

---

Anesthetics

Carbocaine - 3% (no vasoconstrictor)
Cook-Waite/Local Supplier

Citanest - 4% Plain
DentsplyPharmaeutical/Local Supplier

Marcaine - 0.5% (1:200,000 epinephrine)
Cook-Waite /Local Supplier

Septocaine - 4% Articaine hydrochloride (1:100,000 epinephrine)
Septodont, Inc./Local Supplier

My primary choices for anesthetics are Citanest and Marcaine. Citanest should never be administered with a 30 gauge needle for a mandibular block due to possible paresthesia. Septocaine can be used for infiltration of all mandibular teeth however it is less effective for molars.

---

Alginator

(Mechanical alginate mixer saves 30% on alginate cost due to less waste and creates a superior mix)
DUX Dental/Local Supplier

If you are not using an alginate, you should be. It saves time, energy and cuts alginate costs.

---

Clean & Lube Spray (Used after every alginate mix to keep bowl flexible)
DUX Dental

---

Air Abrasion Devices

Rondo Flex 2013
(Delivers a narrow stream of CoJet Sand [3M ESPE] to remove residual Durelon cement from preparations and to clean before cementation and placement of direct composites. Also roughens porcelain before repairing.)
Kavo America Corp.

It creates a sandy aerosol; therefore, masks must be worn and the patient’s face must be covered.

---

Antimicrobials (Intraoral)

Pure 4% CHG – Best Buy Discount Dental Supply

Tubulicid (Red) - Temrex

Clorox Bleach (undiluted) - Local Grocery

The three antimicrobials above represents the “holy triad” of bacterial control. This is the surface treatment of teeth that is applied prior to core builds and before cementation of provisionals. It is not used with self-etching primes such as Clearfil SE Protect and ED Primer.

Grain Alcohol (To kill microbes and flush eugenol from endodontically treated teeth prior to core buildup or post placement). Local Liquor Store

It is best to wait at least two weeks after endodontics to do core build-ups so the eugenol can partially dissipate. It is even better to use AH26 [Dentsply] as an endodontic sealer; it is a resin.

---

Articulating Ribbon

Madame Butterfly Silk (occlusal adjustment)
Almore International, Inc.

I have used silk articulating ribbons since the early days of my career. As with any ribbon, there is a learning curve to using it properly.

---

Barriers

DeOx (Viscous glycerine-based liquid designed to prevent formation of an oxygen inhibition layer on the surface of resin composite materials when they are polymerized). Used during cementation of all ceramic restorations.
Ultradent Products

Oxyguard II (Viscous gel used to block the oxygen from anaerobic setting Panavia 21 and Panavia F cements. Also contains a polymerization accelerator to provide a more effective set). Used during cementation of metal based restorations.
Kuraray USA, Inc./Local Supplier

---

Strupp/Brumm Product List 2019 2 of 22
Opal Dam  Resin barrier used to isolate and protect soft tissue with an impervious seal. *Ultradent Products*

**Base/Liner Material**

*Dycal® Radiopaque Calcium Hydroxide Composition*  *Densply*

Flecks - (Zinc Phosphate - coronal seal for endodontically treated teeth)  *Mizzy Inc./Local Supplier*

I use *Occlufast* primarily due to the density of the material and its quick set time.

**Bleaching Solution**

*Take Home*

Life-Like Bleaching Products (30%)  *Life-Like Cosmetic Solutions*

I use Life-Like Bleaching Products to create a clinical result that works virtually 100% of the time. (30 minutes per day)

I prefer *Enamel Shade Core Paste* as a base composite because it flows to the tooth more smoothly and is self cured. Occasionally in Class I restorations that are medium-to-large sized, I use a flowable light-cured composite like *Aelite Flo* to fill the floor of the cavity before filling it with a posterior resin composite.

**Bite Record Material**

*Occlufast* (Vinyl Polysiloxane bite registration material for centric bite records and indexes)  *Zhermack/Henry Schein*

**Ultra Brush 2.0** (Replaces the sable brush for acrylic paint-in)  *Microbrush International, - Local Supplier*

**Brushes**

*Bend-a-Brush* (Bendable, disposable brushes for applying Primer A & B)  *Centrix, Inc.*

**Bleaching Solution**

*In Office*

Opalescence (20 & 35%)  *Ultradent*

Power bleaching – no light required

**OptiClean (Kerr Dental)**

- Biologic Reshaping: Polish root surface and composites.
- Polaris G80, G100: Closed flap biologic reshaping.

**Ball-Point Applicators** Fine & Medium Heads - For precise applications of ED Primer, A&B Primers and DE Resin. *Pinnacle Products/Local Supplier*
**Burs & Diamonds**

**DIAMONDS**
Brasseler USA
Polaris Diamonds

**Caries Detectors**

**Cari-D-Tect**
I use Cari-D-Tect because it shows decay clearly (residual decay detecting solution inhibits composite bonding). It must be ground away completely. - **Sullivan Schein**

**Cements (Composite Luting)**

**Panavia F 2.0 Tooth Colored, White, Opaque and Light** (Dual cure resin-based cement system for metal, composite and silanated porcelain restorations) - Kuraray USA, Inc.

**Cements (Provisional)**

**Durelon - Polycarboxylate** (Primary provisional cement) - 3M ESPE/Local

**Ceramic Primer**

**Clearfil Ceramic Primer #2250KA** (Used for priming zirconia restoration prior to cementation. It has a molecule that works with zirconia) - Kuraray USA, Inc. / Local Supplier

Research shows that Clearfil Ceramic Primer is one of the best ceramic primers on the market. However, it is important to use only primer that is less than a year old. It must be used on porcelain before and after try-in. The porcelain must be H₃PO₄ decontaminated/treated before silane application.

**Panavia 21 TC** (For posts) - Kuraray USA, Inc. / Local Supplier

My primary cement for all restorations is Panavia F 2.0 Light.
Composites
(Direct Restorations)
G-aenial Universal Flo
GC America

Filtek Supreme Flowable – 3M ESPE

GC Removal Pliers (K.Y. Type)
GC America
The simplest way to remove a single-unit crown is with the Richwil remover. However, bridges are best removed with an instrument that delivers an impact force to the tooth, such as the Corona Flex remover.

Towel Clamp Forceps and Mosquito Hemostats
Hu-Friedy Co
Local Supplier

Crown Removers
Richwil Crown & Bridge Remover
(“Ju Ju Bees”)
Almore International, Inc.

I do not do many posterior composites because I believe they are as inferior as amalgam. I place 90% of the posterior direct restorations with Enamel Shade Core Paste.

Enamel Shade Core Paste
Den-Mat Corp.
The only core material I use is Enamel Shade Core Paste because of its physical properties and color. It is very strong and does not affect the color of thin all-ceramic restorations. (Not photoactivated).

Core Material
Enamel Shade Core Paste (For crown build-ups and caries control)
Den-Mat Corp.

Crown Seaters
Aidaco Bite Sticks (Wooden bite sticks that are used to seat posts and anterior all ceramic crowns.)
Henry Schein/Temrex

#2 Plastic Filling Instrument (PF1HF2) (Used to properly seat posterior restorations during try-in and cementation)
Hu-Friedy Co

Dappen Dishes
Dapaway (Disposable dappen dish)
Dentsply/Local Supplier

To avoid contamination, the Dapaway Dish should never be touched inside the dish by fingers. Only hemostats or cotton pliers should be used to handle the dish. One should remove the dish from the bottom of the stack without touching the inside.

Dappen Dishes # 900-1878 (For mixing Super-T while making improvements to temporaries)
Henry Schein/Local Supplier

Glass Dappen Dish (For soaking retraction cord)
Henry Schein / Local Supplier

Dentin Bonding
All Bond 2 Kit
• Uni-Etch BAC (32% phosphoric acid with benzalkonium chloride)
• Primer A&B
• Dentin/Enamel Bonding Resin
Used for post cementation only. It is compatible with Panavia 21 and All Bond 3 is not Bisco Dental Products

Clearfil SE Protect (Used for all photoactivated resin composites)
Kuraray USA, Inc.

ED Primer (One step bonding; etches and primes simultaneously and is hemostatic and antimicrobial for Panavia F 2.0 and 21)
Kuraray USA, Inc.

We use Clearfil SE Protect for all dentin bonding procedures that use photoactivated resin composites. We use ED Primer when cementing
restorations with Panavia F 2.0 or posts with Panavia 21.

**Dentin Desensitizer**

*Super Seal* (2.9% potassium oxalate)

*Best Buy Discount Dental Supply*

*Super Seal* is an acid chelating oxalate sealer and is always used after bonding procedures are complete, never before.

**Prevident 5000 Varnish 5% Sodium Fl**

*Colgate*

Used on all teeth that are root reshaped starting one week after peri surgery. *Varnish* is also used on abfraction lesions or exposed root surfaces that are sensitive.

**Teethmate Desensitizer** Treatment of exposed dentin & post cementation

*Kuraray USA, Inc.*

**Denture Relining**

*Coe-Soft* (Resilient denture liner)

*GC America, Inc.*

*Hydro-Cast* (Tissue treatment & functional impression material)

*Kay-See Dental Manufacturing Co./ Local Supplier*

*Muco Soft* (Fast & simple chairside soft relines)

*Parkell, Inc.*

*Muco Hard* (Quickly restore long-term comfort and stability with chairside hard relines.)

*Parkell, Inc.*

**Diamond Cleaning Chips**

*Extend-A-Life*

*Ultradent Products, Inc.*

*Extend-A-Life* cleaning chips work well for removing the grinding debris and the red stain that accumulates from marking ribbons from diamonds. Must be used with copious water.

**Dispensers**

*Pure Floss Dispenser* (Contact-Free)

*Jordco, Inc.*

*Portionaid Dispensing Bottle* (Holds liquid in lower chamber; upper chamber measures and dispenses - used for distilled water for alginites and Stallite for Snap Stone.)

*Almore, Inc.*

**Dry Air System**

*Totally Clean and Dry Air System*  
*Best Buy Discount Dental Supply*

The system comprises a unique separation filter inserted into an air line that supplies a *DCI 3-Way Syringe*, which has both inputs hooked up to air only. Since no water feeds the syringe, small water droplets from the syringe will not contaminate your critically dry field. The *Dry Air System* is absolutely necessary to achieve successful dentin bonding.

*DCI Tips #3059*  
*DCI/Sullivan-Schein Dental Products*

To clean syringe tips: soak in acetone, ultrasonic in acetone, ultrasonic in distilled water, then heat sterilize.
**Endodontic Irrigators**

*Stropko Irrigator* (Used for irrigating and drying post spaces - used with *Appli-Vac Micro* yellow 20 ga needle tips)

*Both from Vista Dental*

**Etching Agents**

*Ceram-Etch* (Ceramic etch 9.5% Hydrofluoric Acid)

*Gresco Products, Inc.*

*Ceram-Etch* is a hydrofluoric acid product and must not be allowed near any soft tissue if used intraorally.

*Uni-Etch with BAC* (32% phosphoric acid with benzalkonium chloride for dentin/enamel etch)

*Bisco Dental Products*

*I use blue Flexi-Discs and Sof-Lex Discs for final restoration contour and polish for final margination of vertical cavo-surfaces of partial coverage preparations and to polish tooth surfaces or restorations that were touched while preparing adjacent teeth. They work well to contour and polish composites.*

**Finishing Discs**

*FlexiDisc*

*Cosmedent, Inc./Local Supplier*

**Sof-Lex Sandpaper Discs**

*3M Dental Products Co./Local Supplier*

**Finishing Strips & Saws**

*Compo Strips Red 100F* (Diamond finishing strips)

*3M ESPE/Local Supplier*

*I use blue Flexi-Discs and Sof-Lex Discs for final restoration contour and polish for final margination of vertical cavo-surfaces of partial coverage preparations and to polish tooth surfaces or restorations that were touched while preparing adjacent teeth. They work well to contour and polish composites.*

**Sof-Lex Finishing Strips** (Medium, fine-slotted)

*3M Dental Products Co.*

The downside to direct dentistry is that it is virtually impossible to achieve a sufficiently smooth surface on a restoration by using a strip on the interproximal surface. I generally use strips only on direct composite restorations, rarely on indirect porcelain restorations. Occasionally, I use the fine side of a Sof-Lex finishing strip on an interproximal surface, but now that my lab makes all-porcelain restorations that fit as well as gold castings, there is rarely a need for interproximal finishing.

**Hand Instruments**

*Miller. Articulating Paper Forceps* (Second one on tray set up for holding *Dapaway Dappen Dish* for delivery of primers and bonds)

*Crystal HD Mouth Mirror* (40% Brighter & clearer images)

*Zirc Dental*

*Mirrors* (plastic disposable - used in air abrasion procedures)

*Sullivan-Schein Dental Products*

*Packer #R-55* (Small; used for placing gingival retraction cord. Especially valuable in performing atraumatic cord placement. It must be thinned out for easier less traumatic core placement.)

*Pascal Co.*

*Plastic Instrument* (#PFIHF2, used for seating crowns)

*Hu-Friedy Co.*

*Pedo Explorer #2 Double End* (used to clean cement fragments and to pack cord in tight proximities)

*Hu-Friedy Co.*

*Probe 15mm* (#PCPUNC15, for pre-prep measurements and visual guide)
Strupp/Brumm Product List 2019

Hu-Friedy Co.

**Scaler** (Sickle #SH5/33) **Hu-Friedy Co.**

**Surgical Scalpel #3 with a 12B Blade**
(used to clean composite cement from contact areas)

**Sullivan-Schein Dental Products**

**Uni-Band Advantage**
(sectional matrix forceps)

**Clinician’s Choice**

---

**Handpieces**

**Slow Speed/High Speed**
(Fiber optics Multiflex System with *Intraflex Lux*.
Slow speed #232OL; High speed Mira Lux 3-635B with push button bur release with hard nose chuck; Miltex Instrument Co., Inc./Local Supplier

**Sonic Scaler 2000 N/L**
(Used to remove Durelon cement when it is used as a provisional cement)

**Kavo America Corp.**

---

**Prophy Angles Vantage**
(screw-on type)

**Miltex Instrument Co., Inc./Local Supplier**

---

**Lab Handpiece (Kavo K-9 EWL)**

**Kavo America Corp.**

---

**500 Lab Handpiece**

**Brasseler USA**

---

**Excellent Value**

The word in handpieces is *Kavo*. I probably use the mid-range handpiece more than any other for finalizing margins. Kavo’s electric high-speed handpiece has a high torque and does not stall out. However, its large head, like that of the mid range, can create access problems. In addition, it is heavy. The *K-9 EWL* is vastly superior in smoothness and concentricity to any other lab handpiece on the market for finishing temporaries in the lab. The *Sonicflex Scaler* is great for removing *Durelon* which is used as a provisional cement.

---

**Handpiece Lubricants**

**Kavo Spray**
(Slow speed/high speed)

**Kavo America Corp.**

---

**Super Lube**
(Prophy angle)

**Young Dental Mfg./Local Supplier**

---

**Kavo Quattrocare**
(Automatic cleaning and lubricating system for handpieces)

**Kavo America Corp.**

---

**Hemostatic Agents**

**Hemodent**
(For routine hemorrhage control and saturating epinephrine-containing #7 Siltrax cord)

**Premier Dental/Henry Schein**

---

**Impression Materials**

**Imprint 4**
(3M ESPE]

**Light** (71488) Syringe Pink

**Heavy** (71492) Tray Blue

---

**Affinity Crystal**
(Clear Matrix Impression) **Clinicians Choice/Schein**
Identic (Regular set alginate mixed with distilled water and used for opposing and study models)
*Local Supplier*

My preferred crown and bridge impression material is vinyl polysiloxane.

**Infection Control OSHA Compliance**

*Asep-Gluv* (sterilizable rubber gloves used in sterilization area and operatory disinfection)
*Health Sonics Corp./Local Supplier*

*ChemSorb* (Chemical spill kit)
*Health Sonics Corp./Local Supplier*

**Barriers:**

*Headrest Covers Fabri-cel*
*Local Supplier*

*Tray Sleeve* (covers entire instrument tray)
*Pinnacle Products*

**Masks:**

*Surgical Dental Mask* (Earloop)
*3M Company*

**Sterilant/Disinfectant/Cleaner:**

*Acetone* (Pre-soak for Clean & Dry tips, then ultrasonic in distilled water, then autoclave)
*Local Hardware*

*Birex* (Germicidal detergent for inanimate surfaces)
*Biotrol International/Local Supplier*

*Clorox Bleach* (10:1 dilution used for disinfecting alginate impressions)
*Local Grocery Store*

**Citrizyme** (Ultra concentrated enzymatic evacuation cleaner and instrument pre-soak)
*Local Dental Supply*

**Derma Scrub** (Professional Creme Soap)
*Jones Medical Industries, Inc.*

**Enzymatic Ultrasonic Cleaning Solution.**
*Schein Brand*

**Omni-Cleaner Plus** (Steam autoclave cleaner)
*Pelton & Crane/Local Supplier*

*Valo Light Sleeve Covers* –
*Ultradent Corp.*

**Sterilizers and Monitors:**

*Aquasafe Water Test Kit* (Used to screen bacteria levels in water source)
*HPTC/Pall Corp.*

**Maxitest Biological Monitoring System** (Infection control OSHA compliance)
*Henry Schein*

**Steam Autoclave** (For all instruments)
*Pelton and Crane*

**Hazard Communication** (OSHA Compliance System)
*OSHA.org*
Maxiwipe LA - Disinfecting disposable towelettes Henry Schein

Isolation Aids
Dri Angles (Foil back for protection during preparation and air abrasion) Dental Health Products/Local Supplier
I cannot practice without using Dri Angles to isolate the cheek to avoid cutting it.

NeoDrys (Parotid saliva control) Microscopy
Large or small NeoDrys are the best way to achieve long-term isolation during cementation, build-ups and final impressions. I bend the sharp edges back so they slide more easily into the mouth.

Small Cotton Rolls - Cotton rolls cut into thirds (Smaller volume, retracts lip, not as likely to get under crowns. Used to scrub preparations before vinylpolysiloxane impressions - wipe away excess cement prior to photoactivation) “The Struppettes”

Light Curing Protection
Veratti Bonding Eyewear - great fit Palermo Health Care
Cure Shield (hand held) Premier
Compo-Cover (Protects light cured materials) Practicon, Inc.

Matrices
Palodent Plus (For contacts on posterior composite restorations) (Dentsply)

Mylar Strips .002 gauge Sullivan-Schein Dental

Omni-Matrix (Disposable matrix retainers) - Ultradent Corp.

Tofflemire Retainers with #1 .0015 Ga Bands Sullivan-Schein Dental Products

Measuring Devices
Spring Gauge Caliper (0-10 mm for measuring crown thickness) Mitex/Henry Schein

Light Curing Unit
Valo Light – Ultradent Corp.
Broad band LED curing light

Virtuoso Sapphire (Plasma Arc light 3 Second Cure) Den-Mat Corp.
Triad 2000 (Light curing oven) Dentsply-Trubyte

3 1/2 inch Dividers (for measuring VDO) L.S. Starrett/Jewelry Supplier

Medications
Ibuprofen (Motrin), 800 mg. (prescription only) Whitehall-Robins/Sullivan-Schein
Valium (diazepam) 5 mg. Roche Products, Inc./Local Pharmacy Valium can allow patients to drive within a few hours, and doesn’t result in loss of memory in the office, so it mitigates some potential legal issues.

Valtrex 500 mg. 2 x daily (same as Zovirax - fewer pills) Local Pharmacy

Metal Adhesive Primer
Alloy Primer (Replaces tin plating for all metals - can be used in the mouth) Kuraray USA, Inc./J. Morita

Miscellaneous
AED Plus Defibrillator (Product of the Year) Zoll Medical Corp

Strupp/Brumm Product List 2019
Dress “n” Grind System (To sharpen dull polishing points)
Brasseler, USA

Memory Foam Chair Pad & Headrest Pillow
(Patient comfort for long appointments)
Crescent Product

Nu-Block
(Disposable U-Shaped mouth prop that is thin & flexible)
Efficient Dental Technologies

Stainless Steel Sink Drain Screens
Practicon, Inc.

Teflon Tape—(plumbing department)
Home Depot/Lowes/Local Hardware
(Used to protect adjacent teeth during priming, etch & etc. Also used to protect implant screws in access holes)

Tooth Mould Guide
Ivoclar Vivadent

Upholstery Replacement
(Leather, ultra leather and memory foam chair replacement)
Superior Dental Upholstery

Xenolite Lead Free X-ray Apron
(Light weight /more comfort)
DUX Dental

Mixing Pads
#945 Panavia 21/F Mixing Pads
(Used for all cements and composites).
Kuraray USA, Inc./J. Morita

Mouthguard Material
ProForm Laminates Mouthguards
(Clear and Multicolor)
Dental Resources/Local Supplier

The ProForm football mouthguard is excellent, as is the ProForm vacuum-adapting machine.
Sof-Tray Sheets 0.035 and 0.060 thickness.
Ultradent Products

0.035 is used for bleach & fluoride trays, some night guards and preparation guides. It is also worn by patients with multiple preps during tissue retracted phase and during provisional fabrication. 0.060 is used for night guards for excessive bruxers.

Occlusion Foil
Shimstock Occlusion Foil (Metal foil used to check occlusion and to prevent cement from bonding to adjacent teeth when using resin cement)
Almore International, Inc.
Occlusion foil is used to measure occlusion on restorations during try-in, as well as to check contacts in the lab. It can be tacked down with Opal Dam to protect adjacent teeth and restorations from air abrasion.

Photography
CAMERAS (DIGITAL)

Canon 5d (Used for all intra oral photography)
Canon macro Lens EF 100mm 1:2.8

Canon Macro Twin Lite MT-24EX Twin Flash

Canon MR-14EX II Macro Ring Lite
Canon USA

INTRAORAL GLASS PHOTOGRAPHY MIRRORS
Chromium - PhotoMed International
Rhodium - EMF Corporation

LIP SPREADERS
Cheek Retractors
Practicon Dental

Z-Tray Tree
(Impression tray holder)
Zimmerman Enterprises / Hanry-Schein

OptraGate - (Disposable lip and cheek retractor)
Ivoclar Vivadent
Polishers and Finishers (Intra-Oral)

Shofu OneGloss Cups and Points
(For polishing hybrid composites, prepolish for temporaries and for the final touch of the prep)

Zircon-Brite Polish (Diamond polishing paste for composite and porcelain)

Midgets - White #4782 & Green #4582 (For final polishing of gold and porcelain) Dedeco

Intra-Oral Dialite Porcelain Adjustments Polishing Kit #K000010
Step 1 Blue Dialite™ (reduce polish)
Step 2 Pink Dialite™ (prepolish)

Step 3 Gray Dialite™ (high shine) Brassler USA

Posts
Diamond Hand Reamer #196D-050 (Used to scratch the walls of the post space to increase retention)
Komet-Brasseler

Para Post XP-Titanium Alloy Para Post XP System (Burnout casting posts)
Coltene-Whaledent International

Peso Reamer Right Angle #1-6, Stainless Steel, 32mm
Miltex, Inc.

On the rare occasions when I place posts, I use Coltene-Whaledent products.

Protective Eyewear
Foamies
Henry Schein

Wraparound disposable PET lens used to prevent splatter & dust from entering the patients eyes. Size large tinted recommended.

Preparation Protection
Masque- (Water soluble lubricant used to slather crowns prior to cementing with resin composite luting cement)

Para Post XP-Titanium Alloy Para Post XP System (Burnout casting posts)
Coltene-Whaledent International

Peso Reamer Right Angle #1-6, Stainless Steel, 32mm
Miltex, Inc.

On the rare occasions when I place posts, I use Coltene-Whaledent products.

Products Dispensed from 3 cc Syringes with Color Codes
Hemodent 3M ESPE - Red
Pure 4% CHG Best Buy Discount Dental Supply - White
Na OCI [Clorox] - Orange
Isolit Degudent - Yellow
Grain Alcohol Everclear - Black
Tubulicid Red Temrex - Blue
Super Seal Best Buy Discount Dental Supply - Green
Cari-D-Tect Best Buy Discount Dental Supply - No color code

H.J. Bosworth/Local Supplier
Masque is preferable to Vaseline, because Masque will not stick to the surface of the tooth and tissue, and is easier to rinse off.

Opal Dam (Light cured resin dam material)
Ultradent

Step 3 Gray Dialite™ (high shine)
Brassler USA
Retraction Cord

#7 Siltrax Epi Retraction Cord
Pascal Company, Inc./Local Supplier

- Only place one cord; remove cord before injecting Light Body with healthy tissue; remove cord after injecting Light Body with unhealthy tissue, then reinject.
- Siltrax is one of the best retraction cords on the market. It must be soaked in Hemodent [3M ESPE] and immediately rinsed after placement to avoid systemic epinephrine reactions.

Separating Agent

DVA Acrylic and Plaster Separator
(Used as a separator between model and acrylic for indirect temporaries)

- DVA Acrylic and Plaster Separator is one of the three materials we use to separate acrylic from a model.
- Isolit (Releasing agent for direct paint-in temporaries and die lubrication)
  Degussa Dental, Inc.
  Isolit is the die lubricant used in my lab.
- Ultrasept™ III Mold Release (Spacer to compensate acrylic shrinkage for indirect temporary technique) (Ultradent) occasionally used as a separating agent in making temporaries for excessively retentive cases.

Scissors

Crown & Bridge 4” Curved
Hu-Friedy Co.

Ultra Trim (Vinyl scalloping scissors for bleach & fluoride trays)
Ultradent Products, Inc.

Sealants

GC Universal Flo -GC America

- I prefer flowable resin composites to use as sealants.

Shims

Ellman Press Form Kit .030 Sheets
(For making shims for temporaries)
Ellman Dental Mfg. Co.
  The Ellman Press Form Kit is used for making shims when a few temporaries, up to a quadrant, are being made. When making more than a few units, sheets are vacuum-adapted.

Syringes

Centrix Syringes
S/Class - Stainless Steel
(Used for injecting cores and easy to express materials)
Centrix, Inc.
  The S/Class is the finest syringe on the market for injecting core paste with Needle Tubes.

3 cc Syringes - With Inspiral Brush Tips, Blue Micro Tips, or Blue Mini Dento-infusor Tips (delivery systems for multiple materials, recommended for a wide variety of uses)
Best Buy Discount Dental Supply

Syringe Filling Bottles

Plastic Bottles (Luer lock tops for filling 3 cc Syringes)
Best Buy Discount Dental Supply

Syringe Tips

Blue Mini Dento Infusor Tip
(Use on a 3cc syringe with Tubulicid Red)
Ultradent

Inspiral Brush Tips
Use on a 3cc syringe with 4% CHG
Ultradent

Multipurpose 18 Ga. Pink Tips for DeOx Schein

Tapes Storage Containers

Vinyl electrical tape (Various colors for identifying 3 cc Syringes)
Local hardware store
**Toothbrush**

*End-Tuft Toothbrush* (For general scrubbing and cleaning crown preparations prior to sealing and impressions)

*Butler Co.*

The *End-Tuft Toothbrush* is used on virtually every case in my office to clean up before impressions. In addition, it is given to patients for home care. The end of the brush should be bent to facilitate access to the distal aspect of second molars.

**Torque Driver Set**

*Set DIA-250* (Used on implant screws and Johnson Screw Attachment)

*Nobel Biocare Company*

**Tray Cleaner**

*Green Envy Tray Cleaner* (For removing alginate) – *Whip Mix Corp.*

Tray cleaners facilitate cleaning of alginate from trays without scratching (saves money).

**Trays (Custom)**

*ProCure Custom Tray* (Light-cured composite wafer)

*Dental Resources, Inc.*

Custom trays are made for almost every master impression in my office.

**Trays (Stock)**

*Tray Away* - *Bosworth*

Stock trays are used for temporary impressions and occasionally for single units, although custom trays are preferred.

**Trays (Perforated)**

*Rim-Lock Perforated Tray* (Stainless steel for alginites)

*Coe/Local Supplier*

**Vacuum System**

*Shock ‘t’a’ Clear* (Highly concentrated vacuum cleaning and decontaminating tablets; facilitates removing “age old” accumulations from operatory lines)

*Palmero Health Care*  
*Vac-K ’ta' Clear* (Weekly time-released maintenance, cleaning and decontaminating tablet)

*Palmero Health Care*  
*Vac Attack Premier* (Daily vacuum line cleaner)

*Sullivan-Schein Dental Products*

**Vacuum Tips**

*Soft-Tip Plastic Screen* (Fits high volume aspirators; prevents one from grabbing the tongue, cheek, soft tissue and catches uncemented restorations)

*Quality Aspirators*

The *Soft-Tip screen* is a significant aid for dental assistants.

*Vent-O-Vac* (Short disposable high speed suction tips)

*Young Dental Mfg. Co./Local Supplier*

**Vision Enhancers**

*Loupes* 4.5x and 6x, 8x with 14" focal length; almost all focal lengths available. - *Designs for Vision, Inc.*  
*LED Cordless Lights*  
*Designs for Vision, Inc.*

**Wax**

*Almore Wax* (For making wax sticks)  
*Almore International Inc.*

**TruWax Baseplate Wax, Extra Hard** (Used to check occlusal clearance)  
*Dentsply*

*Utility Wax - Round Strips* (Used to hold crown for shade verification)  
*Local Supplier*

**Wax Stick Mold**

*Peripheny Wax* – blue by Surgident

**Wedges**

*Palodent Plus Wedges* (Palodent)

I use wedges for direct restorations, which are done infrequently in my office.

*Wedge Wands* (Ultra thin wedge with handle)

*Garrison Dental Solution*
